**THE SIMPLIFIED, AFFORDABLE K-12 SAFETY REPORT!**

## Completion of Your Level Two SITE|SAFETYNET<sup>SM</sup> Assessment: Building a Unified Safety Strategy

Congratulations on completing Level Two of the SITE|SAFETYNET<sup>SM</sup> comprehensive safety assessment. This achievement represents a crucial advancement in fortifying the safety of your educational institution's exterior environment. The detailed report provided is a testament to a thorough examination of your campus's exterior safety measures, including perimeter security, access control, and emergency preparedness.

At this stage, our assessment transcends conventional security reviews by emphasizing the development of a robust and integrated exterior safety strategy. This strategy encompasses a review of physical barriers, surveillance systems, lighting, and communication protocols, essential for creating a secure outdoor learning and recreational environment. Our evaluation classifies your school's exterior safety measures as Excellent, Average, or Poor, with our Dynamic Safety Score (DSS) offering a straightforward assessment of where your campus stands and highlighting areas for improvement.

Understanding the pivotal role of outdoor safety in your school's comprehensive security strategy is essential, especially in addressing concerns related to gun violence. The SITE|SAFETYNET<sup>SM</sup> report serves as a crucial instrument in this context, pinpointing your institution's strengths and weaknesses by meticulously evaluating and scoring various aspects of your outdoor safety infrastructure. These evaluations are specifically designed to illuminate areas where your campus excels and, more critically, where it falls short in protecting against potential gun violence and external threats.

Our tailored suggestions, derived from this evaluation, are aimed at bolstering your campus's defenses, focusing on enhancing perimeter security, access controls, and emergency response capabilities. By identifying areas with average and poor scores, we establish a reference point from which improvements can be systematically addressed. This approach not only aims to fortify your campus against gun violence but also to create a comprehensive, secure environment for all outdoor activities, ensuring a safe educational setting for students and staff alike.

To assist in making this comprehensive data more digestible, the report incorporates advanced data visualization techniques. Utilizing image capture and charts and graphs, we present the data in a manner that is both easy to understand and actionable, enabling you and your leadership team to make informed decisions regarding your exterior safety strategy.

We stand ready to support your journey towards achieving unparalleled campus safety, providing expert advice, continuous guidance, and the tools necessary to elevate your school to a sanctuary of security and tranquility.

The SITE|SAFETYNET<sup>SM</sup> Team

## CREATING A UNITED DEFENSE PERIMETER

You are prioritizing the enhancement of outdoor safety by implementing comprehensive strategies, including the reinforcement of perimeter measures, to ensure a secure environment within your campus premises. This collaborative effort, combined with aligned policies on proactive outdoor surveillance and secure campus access, lays the foundation for a comprehensive strategy to safeguard the exterior of your educational environment.

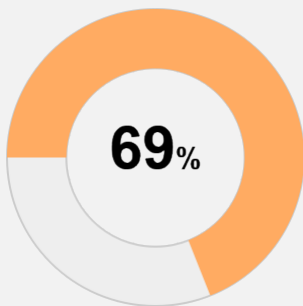

## OVERALL LEVEL-TWO (2) RATING

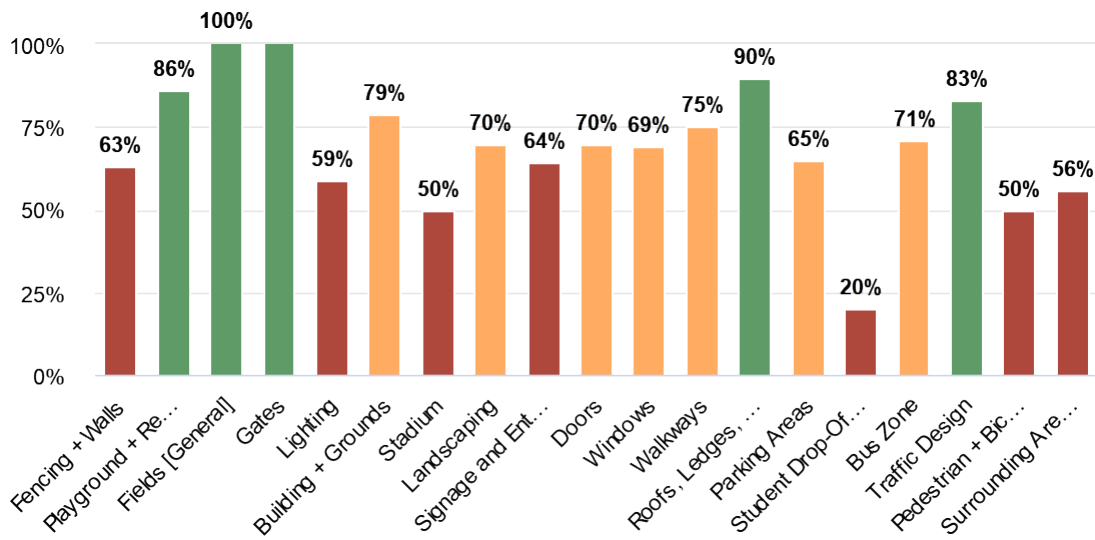

Your overall rating score is 69%.

Safety Ranks are assigned from Excellent, to Average and Poor. Safety Rank Average is considered adequate for most K-12 institutions. Safety Rank Poor is assigned for high-risk environments.

**For an Overall Grade of Average:** Your school has received an overall average grade in our comprehensive exterior safety and vulnerability assessment. This indicates that while your school has implemented foundational safety and security measures, there is room for improvement in several areas to achieve a higher level of safety excellence. Enhancements in lighting, pedestrian and bicycle safety, traffic design, and stronger integration with community safety initiatives are among the areas that could significantly benefit from further attention. To elevate your overall safety standing, a strategic plan focusing on these improvement areas, coupled with regular safety audits and community engagement, will be essential. Investing in these areas will not only enhance the physical safety of your campus but also foster a safer, more supportive learning environment for all.

**For an Overall Grade of Poor:** The comprehensive exterior safety and vulnerability assess

14. Parking Area
15. Student Drop-Off + Loading Areas
16. Bus Zone
17. Traffic Design
18. Pedestrian + Bicycle Safety
19. Surrounding Area + Neighborhood

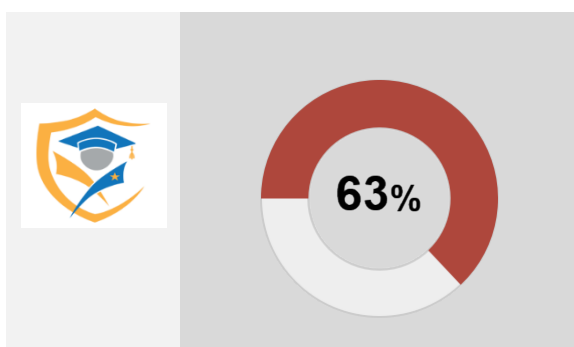

### K-12 School Shooting Database: School Level

# YOUR ASSESSMENT SUMMARY

## 1. Fencing + Walls

**Score: Poor**

The "Poor" rating received by your school in the Fencing + Walls section highlights significant

concerns regarding your school's perimeter security as it relates to gun safety and shooter prevention. This assessment indicates that current fencing and wall measures are insufficiently secure, potentially compromised, or inadequately designed to deter or prevent unauthorized access effectively. Immediate action is required to address these critical vulnerabilities. Upgrading physical barriers to meet recommended security standards, ensuring comprehensive coverage and integration with other security measures, and implementing regular inspections and maintenance routines are essential steps. Enhancing your perimeter defenses will serve as a fundamental component of a comprehensive security strategy, providing a stronger, more effective barrier against potential threats.

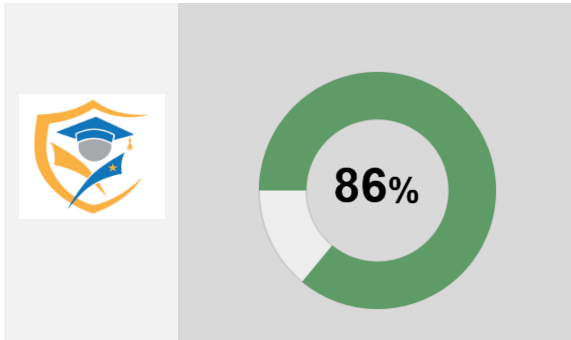

No Image

No Image

## 2. Playground + Recreational Areas

### Score: Excellent

Your school has earned an "Excellent" rating in the assessment of your playground and recreational

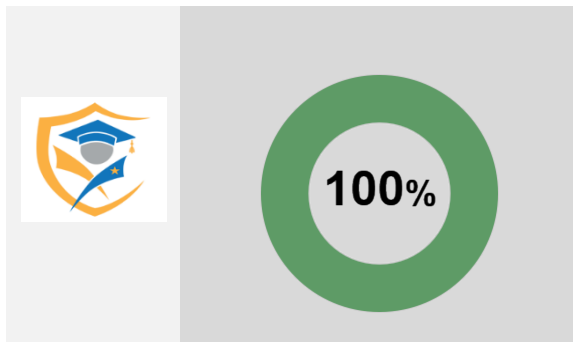

areas as part of the Level 2 school gun safety and shooter prevention measures. This top-tier score indicates that your recreational spaces are not only safe and secure but also thoughtfully designed to ensure the well-being of students during play and leisure activities. Features such as secure, controlled access points, visibility from school buildings, and the presence of surveillance systems demonstrate a proactive approach to safety. Additionally, these areas are well-maintained and free from hazards, further contributing to a secure environment. Continual monitoring and periodic enhancements based on the latest safety standards and community feedback will ensure these areas remain exemplary spaces for student engagement and well-being.

No Image

No Image

No Image

### 3. Fields (General)

**Score: Excellent**

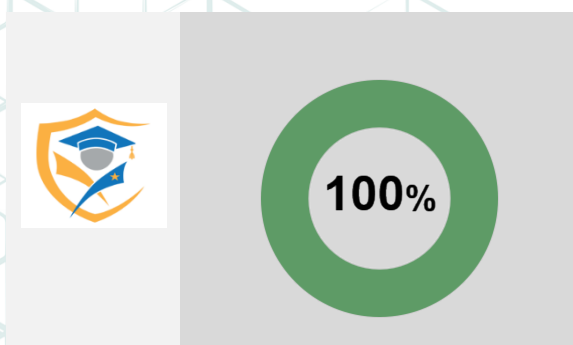

Your school has attained an "Excellent" rating in the evaluation of your general fields as part of the Level 2 assessment for school gun safety and shooter prevention. This exceptional rating reflects the comprehensive safety measures and thoughtful design implemented across your outdoor fields. Effective perimeter security, controlled access points, and high-visibility areas from school buildings are indicative of a well-considered strategy that prioritizes student safety without compromising the quality of outdoor activities. The integration of surveillance systems and emergency response protocols ensures a rapid and coordinated response to any potential incidents. To sustain this level of excellence, continuous review and adaptation of safety measures in response to new insights and technological advancements are recommended.

No Image

No Image

No Image

### 4. Gates

## Score: Excellent

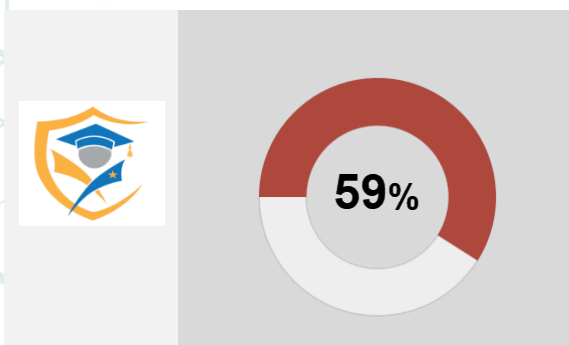

Your school has achieved an "Excellent" rating in the assessment of your gates as part of the Level 2 assessment for school gun safety and shooter prevention. This rating is a testament to your school's implementation of comprehensive and effective gate security measures that significantly enhance the safety of your campus. Your gates are not only designed to control and monitor access effectively but are also integrated with advanced security systems, such as surveillance cameras and access control technologies, ensuring that only authorized individuals can enter the premises. Regular maintenance and security drills ensure these critical points remain robust against potential threats. Continuing to prioritize gate security and exploring advancements in security technology will ensure your school remains a safe environment for students and staff.

No Image

No Image

No Image

## 5. Lighting

**Score: Poor**

Your school has received a "Poor" rating in the campus lighting section of the school gun safety and shooter prevention assessment. This rating underscores critical deficiencies in your current lighting infrastructure, which compromises the safety and security of students and staff, especially during evening hours and in low-light conditions. Key areas of concern include inadequate coverage of essential pathways, entrances, and communal areas, leading to dark spots that could pose security risks. Immediate actions, such as comprehensive upgrades to lighting systems,

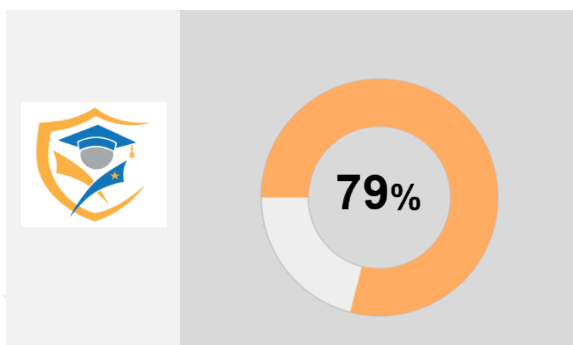

installation of additional light fixtures in critical areas, and transition to high-efficiency lighting technologies, are imperative. Addressing these lighting deficiencies is essential for creating a secure and welcoming environment that discourages potential threats and enhances the overall well-being of the school community.

No Image

No Image

No Image

## 6. Building + Grounds

### Score: Average

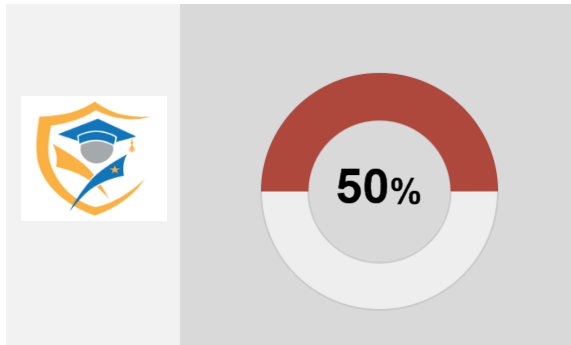

The "Average" rating assigned to your school in the assessment of your Buildings and Grounds indicates a solid foundation in physical security with room for enhancements to reach an optimal level of safety. While key elements such as locked doors, limited access points, and some level of surveillance are in place, there are areas that could be significantly improved. These improvements might include upgrading physical barriers, increasing surveillance coverage, and enhancing the maintenance of buildings and grounds to eliminate potential safety hazards. Additionally, incorporating more advanced security technologies and improving the training of staff and students on emergency response protocols could further strengthen your school's security posture. Addressing these areas will not only enhance the physical security of your campus but also foster a safer learning environment for everyone.

No Image

No Image

No Image

## 7. Stadium

**Score: Poor**

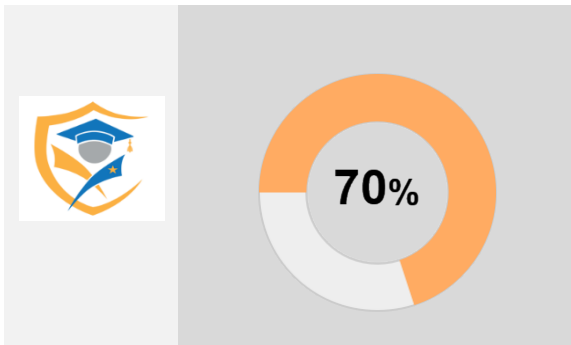

Your school's stadium has been rated as "Poor" in the Level 2 assessment for school gun safety and shooter prevention, indicating critical areas of concern that demand immediate attention. The current security measures are insufficient to adequately protect attendees from potential threats, with significant gaps in access control, surveillance, and emergency preparedness. Immediate actions, such as the installation of comprehensive surveillance systems, the implementation of strict access control measures, and the development of a clear, actionable emergency response plan, are crucial steps towards mitigating these risks. Enhancing the physical security infrastructure and ensuring regular safety drills and training for staff and security personnel will be vital in improving the stadium's safety rating.

No Image

No Image

No Image

## 8. Landscaping

## Score: Average

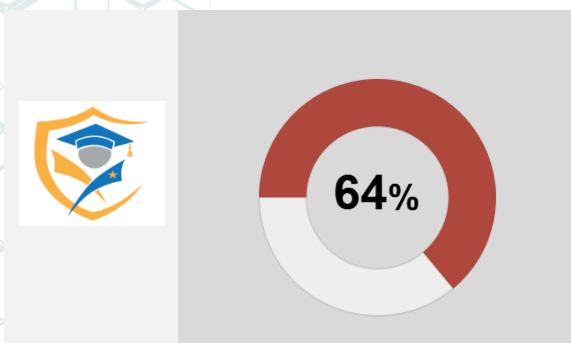

The landscaping at your school has received an "Average" rating in its assessment for school gun safety and shooter prevention measures. Your current landscaping practices provide a basic level of security and aesthetic appeal; however, there are significant opportunities for enhancement. Increasing the strategic placement of trees and shrubs to improve visibility and control access points can further deter potential threats. Additionally, incorporating more durable and low-maintenance plantings can reduce hiding spots and enhance the overall safety and attractiveness of the campus. Focusing on these improvements will not only elevate the security effectiveness of your landscaping but also enhance the environmental quality and enjoyment of outdoor spaces for the school community.

No Image

No Image

No Image

## 9. Signage + Entrances

## Score: Poor

Your school has received a "Poor" rating in the Signage and Entrances section, highlighting significant areas for improvement in campus navigation and entrance security. The current

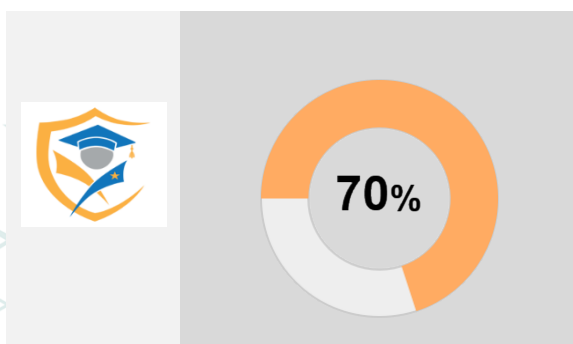

signage may be inadequate, unclear, or poorly placed, leading to potential confusion and security vulnerabilities. Entrances lack sufficient control measures to effectively monitor and restrict access. Immediate steps should be taken to overhaul signage for better clarity and visibility and to enhance entrance security with modern access control systems. Investing in comprehensive signage strategies and entrance technologies is crucial for improving safety, navigation, and the overall security posture of the campus.

No Image

No Image

No Image

## 10. Doors

### Score: Average

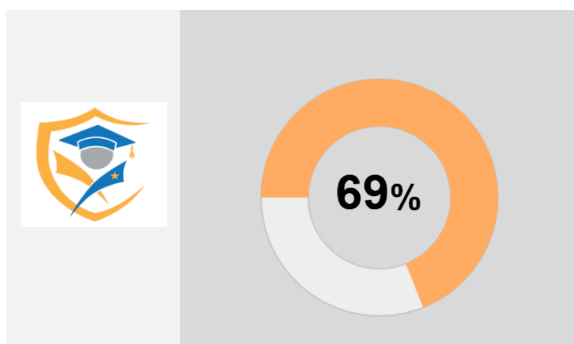

Your school's doors have received an "Average" rating, indicating a foundational level of security with significant room for improvement. While basic security features are in place, including lockable doors and some level of access control, there is a need for enhancements to meet higher safety standards. Prioritizing the upgrade of door materials to more durable options, implementing more sophisticated locking mechanisms, and ensuring all doors are capable of a swift lockdown can dramatically increase the security of the school. Regular training for staff and students on emergency door operations will also enhance preparedness and safety. Addressing these areas will significantly improve the overall security of your school's doors.

No Image

No Image

No Image

## 11. Windows

**Score: Average**

The windows at your school have achieved an "Average" rating, indicating that while basic security features are present, there is considerable room for enhancement. Current window security measures may include standard locking mechanisms and some level of reinforced glass, but to reach an optimal level of safety, further improvements are necessary. Upgrading to impact-resistant materials, enhancing lock systems, and possibly integrating window alarms can significantly increase security. Regular reviews and maintenance of window security features are essential to ensure they function correctly and continue to protect against external threats. Addressing these areas will markedly improve the safety provided by the school's windows.

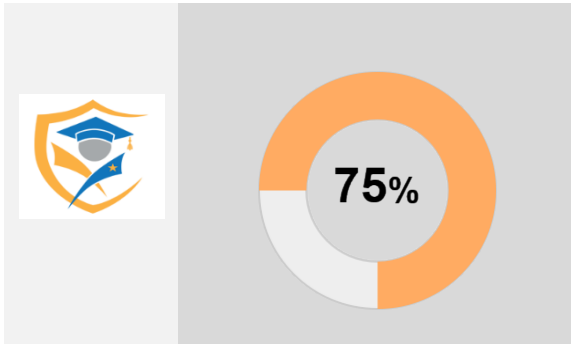

No Image

No Image

No Image

## 12. {ResponseAnswer.Image}Walkways

## Score: Average

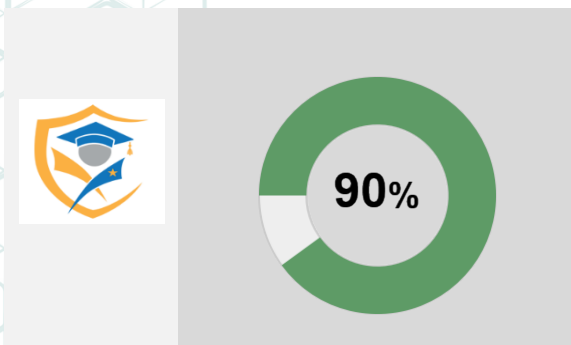

The walkways at your school have been rated as "Average," indicating a solid foundation in design and maintenance but highlighting areas where improvements can be made to elevate safety and security standards. While the walkways provide basic connectivity and access across the campus, enhancements in lighting, visibility, and material durability could significantly improve safety for students and staff. Addressing issues such as uneven surfaces, inadequate lighting in certain areas, and the need for clearer signage can make navigation safer and more intuitive. Focused efforts to upgrade these aspects will not only improve the functionality and security of the school's walkways but also contribute to a more welcoming and safe campus environment.

No Image

No Image

No Image

### 13. Roofs, Ledges, Other Access

## Score: Excellent

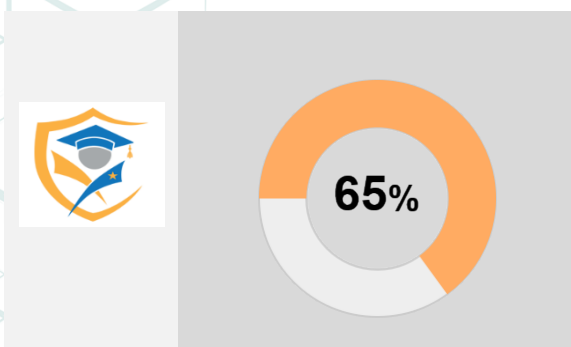

Your school has been awarded an "Excellent" rating for the assessment of roofs, ledges, and other potential access points in the context of Level 2 school gun safety and shooter prevention measures. This superior rating reflects the school's comprehensive approach to securing these less visible but critical areas. Measures such as restricted access to roofs and ledges, the installation of deterrents to unauthorized entry, and the integration of these areas into the school's overall security surveillance system demonstrate a proactive stance towards campus safety. Regular inspections and maintenance ensure that these defenses remain effective and that any potential vulnerabilities are promptly addressed. Continued vigilance and adaptation of security measures to emerging threats will sustain your school's high standard of protection in these areas.

No Image

No Image

No Image

### 14. Parking Areas

## Score: Average

The parking areas at your school have received an "Average" rating, indicating a foundational level of security with room for notable improvements. Basic measures such as minimal lighting and limited surveillance are implemented, but to enhance safety and deter potential threats, additional steps are needed. Improving lighting, increasing surveillance coverage, and implementing more effective access control measures can significantly elevate the security of the parking areas.

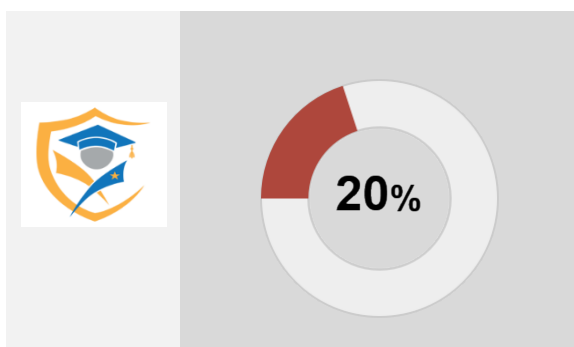

Regular reviews of the parking layout and security protocols, along with targeted enhancements, will contribute to a safer campus environment for all.

No Image

No Image

No Image

## 15. Student Drop-Off + Loading Areas

**Score: Poor**

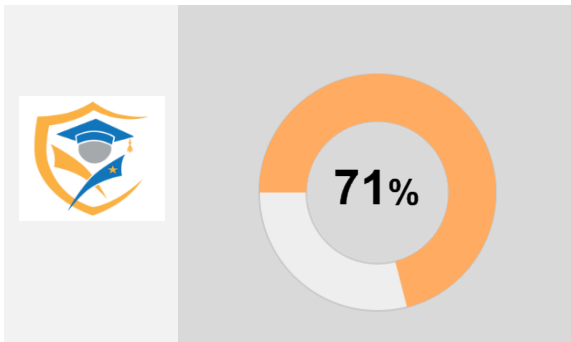

Your school's student drop-off and loading zones have received a "Poor" rating, highlighting critical areas of concern that need immediate attention. The current setup may contribute to unsafe congestion, limited supervision, and unclear signage, all of which increase the vulnerability of students during peak times. Urgent measures are needed to redesign these zones for better flow and safety, including implementing clear signage, establishing dedicated lanes, and ensuring adequate staff presence for monitoring and assistance. Addressing these issues is essential for creating a safer environment for students during drop-off and pick-up times and is a crucial step toward enhancing the overall security posture of the school.

No Image

No Image

No Image

## 16. Bus Zone

**Score: Average**

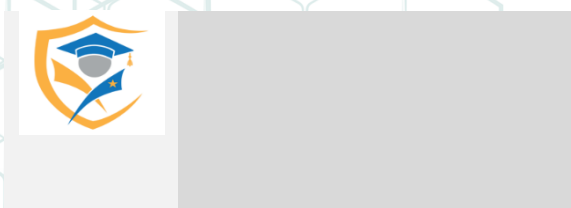

The bus zone at your school has been rated as "Average," indicating that while there are basic safety measures in place, there is considerable room for improvement to achieve a higher level of security and efficiency. Enhancements in signage clarity, traffic flow management, and supervision could significantly improve the safety of students during peak bus times. Implementing a more structured approach to bus arrivals and departures, including better-defined lanes and increased staff presence, can elevate the safety standards of the bus zone. Regular reviews and updates to these procedures are recommended to ensure the bus zone meets the best practices for school safety and student security.

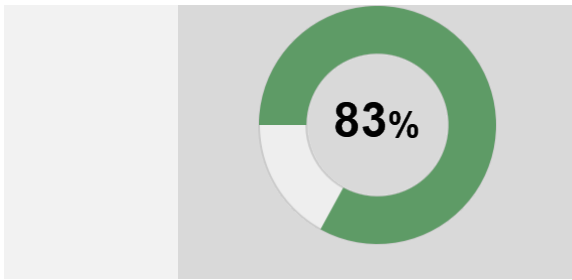

No Image

No Image

No Image

## 17. Traffic Design

## Score: Excellent

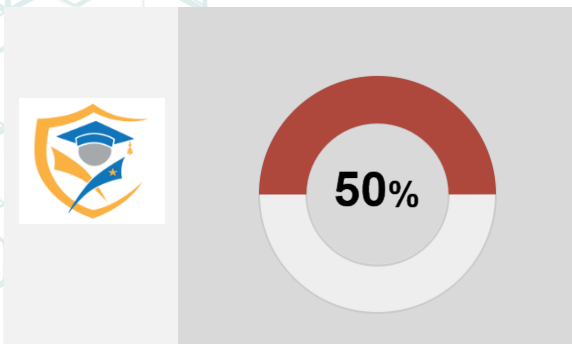

Your school has been awarded an "Excellent" rating in the assessment of its traffic design as part of the Level 2 evaluation for school gun safety and shooter prevention. This distinction signifies that your school's traffic design effectively supports safe and efficient movement around the campus, including pedestrian walkways, vehicle pathways, and bus zones. The strategic implementation of clear signage, well-defined lanes, and regulated speed limits, coupled with vigilant supervision, ensures a high level of safety for students, staff, and visitors. The thoughtful consideration given to emergency vehicle access and the ability to enact swift lockdown procedures in case of a threat further exemplifies the school's commitment to safety. Continuous review and adaptation of traffic patterns to accommodate growing needs and changing conditions will ensure sustained excellence in campus safety.

No Image

No Image

No Image

## 18. Pedestrian + Bicycle Safety

## Score: Poor

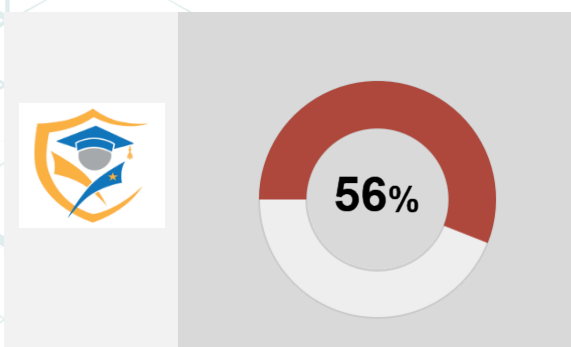

Your school's pedestrian and bicycle safety measures have received a "Poor" rating, highlighting urgent safety concerns that need immediate attention. The lack of safe, designated pathways for pedestrians and cyclists, insufficient crosswalk visibility, and inadequate secure storage for bicycles are major deficiencies that compromise safety. Immediate actions required include the development of clear, safe pathways for walking and biking, the implementation of prominent safety signage, and the creation of secure bicycle parking areas. Additionally, introducing or enhancing safety education programs for all students will raise awareness and promote safer practices. Addressing these critical issues is essential for improving the overall safety and well-being of the school community.

No Image

No Image

No Image

## 19. Surrounding Area + Neighbourhood

### Score: Poor

Your school's surrounding area and neighborhood have received a "Poor" rating, highlighting critical safety concerns that demand immediate action. Issues such as inadequate lighting, limited community engagement in safety efforts, and a lack of visible security presence pose significant risks to students and staff. Collaborating with local authorities to increase patrols, working with community organizations to launch safety improvement initiatives, and advocating for infrastructure enhancements are urgent steps needed to

address these concerns. Developing a comprehensive strategy that involves school, community, and law enforcement collaboration will be crucial in transforming the neighborhood into a safer environment for everyone.
