

The Ultimate K-12 Safety Assessment Tool: Engineered for Real-Time and Continuous Site Assessments and Quarterly Reassessments

Measure and Score Your Security Strengths and Weaknesses to Improve Safety All Year

At SITE|SAFETYNETSM, we recognize the urgent and critical need for real-time and continuous safety monitoring throughout the school year. Our unique and proprietary cloud-based platform empowers schools with active safety assessments and reassessments, ensuring they maintain the highest level of security. Here are the key features that set our platform apart:

- **Proprietary 60-Point Safety Zone Assessment (P-60):** Our groundbreaking approach divides and evaluates school safety into 60 distinct safety zones. This ensures tailored and comprehensive safety measures for every area, including Police partnerships leaving no aspect of school safety unaddressed. [Uvalde, TX. Robb Elementary](#)
- **Dynamic Safety Score (DSS):** DSS is a unique, cutting-edge performance scoring system that provides real-time insights into the status of each safety zone. This advanced system evaluates safety conditions, allowing for immediate updates and targeted improvements. By delivering critical data in real-time, the DSS empowers schools to identify and address potential threats proactively.
- **Automated Safety Reports (ASR):** Our platform automatically generates safety reports based on real-time data, delivering actionable insights to school administrators and stakeholders. This enables swift and continuously informed decision-making to enhance school safety throughout the year.
- **Real-Time Assessments and Reassessments (RTAR):** Our advanced safety management system relies on the P-60, DSS, and ASR methodologies, making real-time and continuous safety assessments and reassessments its cornerstone. Our platform ensures ongoing safety improvements by leveraging these cutting-edge technologies, data analytics, and machine learning capabilities.
- **Scalable Solutions:** Our cloud-based foundational model is designed to meet the needs of any institution, from small rural schools to large urban districts. This active and continuous safety system ensures that every school, regardless of size or safety budget and wherever they are in their safety journey, can benefit from our comprehensive real-time safety solutions. Utilized by schools nationwide, our platform provides critical, instant, and continuous data that other security organizations do not offer.

AFFORDABLE PEACE OF MIND!

Subscribe for the entire school year for only \$990—less than the replacement cost of a computer—parents feel more confident having their children attend [SITE|SAFETYNETSM](#) schools.
